Edwin J. Day, County Executive

TITLE: Forensic Toxicology Services

RFP NUMBER: RFP-RC-2021-002

STATEMENT OF OBJECTIVES

The County of Rockland Medical Examiner's office requires Forensic Toxicology testing services in order to determine the cause, manner and circumstances of death. Toxicology services must be performed to detect potential toxicants, such as chemicals, drugs and poisons in the decedents.

The County of Rockland may also require forensic toxicology testing services for other County departments such as the District Attorney's Office. This analysis which will include identification and quantitative analysis of drugs and alcohol from blood urine and evidence specimens.

The contractor will be responsible for the following:

- The Contractor must pick up specimens for analysis from the County of Rockland Office of Medical Examiners Office daily. Specimens must be picked up within three hours of request.
 - Specimens may be picked up daily by a common carrier (ie: Fedex, UPS) for overnight delivery to the contractor's laboratory at the expense of the contractor. Pick up times must be agreed upon by the laboratory and the Rockland County Medical Examiner's Office.
- Specimens must be transferred directly to Forensic Scientist using acceptable chain of custody procedures.
- Contractor must perform and provide analysis in an appropriate and acceptable amount of time to investigating authorities and the District Attorney's Office with information that is vital to their investigations.
- Contractor must be available for consultation during the processing of a case, on an as needed basis.
- The Contractor must be able to provide expert testimony upon the request of Rockland County.
 - Expert testimony has been required once within the past five years. Actual requirements will be dependent on the need of the Rockland County Department of Health and the Medical Examiner's Office.
- Forensic Scientist must issue a report of their findings and must be available for consultation during the processing of a case, on an as needed basis.
- The Contractor may be required to provide a Forensic Toxicologist to perform on scene investigations of toxicological nature. The contractor will be given twelve (12) to Twenty-four (24) hours' notice if it is required for a Forensic Toxicologist to perform on scene investigation.
- Contractor must be available for review of the results of each case.
- Contractor must be responsible for the proper return of evidence after analysis is completed.

LABORATORY AND ANALYSIS REQUIREMENTS

- Contractor's Laboratory must be capable and qualified to conduct toxicological examinations on all forms of biological specimens including fluid and organ (solid) materials as well as pills, syringes and other drug paraphernalia when required.

Edwin J. Day, County Executive

TITLE: Forensic Toxicology Services

RFP NUMBER: RFP-RC-2021-002

- Contractor must examine the specimens for therapeutic drugs, illicit drugs and other drugs of abuse and their metabolites (such as Benzoyllecgonine and Cocaethylene), as well as metals and poisons, etc. The results must be reported qualitatively as well as quantitatively, when indicated.
- Testing results must indicate the sensitivity of the test and reporting limits.
- A comprehensive list of drug panels (such as common drugs of abuse, therapeutic drugs, carbon monoxide, etc.) with a standard price, which can be supplemented with extra testing as needed with “a la carte” pricing must be provided with the proposal.
- Contractor’s Laboratory must be capable and qualified to conduct clinical profiles (such as electrolyte panels) on body fluids such as vitreous humor (eye fluid), cerebrospinal fluid, urine and blood.
- Contractor’s Laboratory must be capable and qualified to perform toxicological analysis on such unusual samples as hair, nails, teeth, insect larvae or bone marrow when required by the County of Rockland.

REPORTING REQUIREMENTS

- A Forensic Scientist certified by the American Board of Forensic Toxicology (DABFT) must issue contractor’s report of findings.
- Reports should contain a list of all positively identified substances, quantitative as indicated. In addition, the report should indicate concentrations of biologically active metabolites produced by the parent drug of controlled substances.
- Contractor may provide comments or interpretation regarding the findings, for instance in a case of overdose.
- Reports should indicate which medium was used for identification and which for quantifying, for the purpose of interpretation of distribution studies.

CHAIN OF CUSTODY

- Specimens must be transferred directly to a forensic scientist using acceptable chain of custody procedures.
- Contractor must be responsible for the proper transportation and storage of specimens during analysis.
- Contractor must maintain an internal chain of custody for all specimens.

REVIEWS AND MEETINGS

Contractor must provide a representative to attend Rockland County Office of the Medical Examiner staff meetings

Edwin J. Day, County Executive

TITLE: Forensic Toxicology Services

RFP NUMBER: RFP-RC-2021-002

on site or via teleconference or video conference for purposes as follows:

- Provide expertise during discussions of the toxicological aspects of County cases.
- To provide our staff with the latest advances in toxicology.
- To keep the Contractor aware of the changing needs of the Rockland County Office of the Medical Examiner and forensic medicine in general.

Contractor must highlight any information specific to a case, when reviewing a case with a member of the Rockland County Office of the Medical Examiner, in order to ensure that the proper analysis is performed.

The County of Rockland estimates an average of 175 cases per year and will have approximately two Medical Examiners Meetings that would require the Forensic Toxicologists presence.

WORK PLAN STRUCTURE

Based on the contractors past experience submit a detailed methodology of how the objectives of the County might be achieved by selecting your firm. Include a description of how you would approach and complete all the tasks from how you would receive samples to performing all of the tasks of Forensic Toxicology including but not limited to testing, analysis, reporting, expertise, testimony and meeting all scope of objectives.

BUSINESS ASSOCIATE AGREEMENT

Firm must agree to all terms and conditions as listed in the Business Associates Agreement included in this solicitation. Awarded Contractor must be required to execute the Business Associates Agreement at time of contract. In addition, each contract year a newly signed Business Associates Agreement must be required

LICENSES, PERMITS AND CERTIFICATIONS

All licenses are required to be submitted with the proposal.

- Licenses, permits and certifications required by Federal, State and local government that apply to Forensic Science.
 - Certificate of Laboratory Accreditation in Forensic Toxicology awarded by American Board or Forensic Toxicology (ABFT)
 - College of American Pathologists (CAP)
 - Laboratory Accreditation Program (LAP)
 - NY State Department of Health Laboratory Permit
- Forensic Scientist certified by the American Board of Forensic Toxicology (DABFT) or certification of equal nature.
- Toxicologist with a minimum degree level of Ph.D.

Contractor must observe and obey all laws, ordinances, rules and regulations of the Federal, State, and local government that apply to Forensic Science.

Edwin J. Day, County Executive

TITLE: Forensic Toxicology Services

RFP NUMBER: RFP-RC-2021-002

Contractor must submit all current certifications required by the Federal, State, and local government that apply to Forensic Science. Copies must be submitted with proposal. For New York State see NYS Public Health Law, section 574 <https://www.nysenate.gov/legislation/laws/PBH/574>

REQUIREMENTS AND QUALIFICATIONS

- Contractor must have a minimum of five (5) years acceptable specific experience in Toxicological and Forensic Tests and Analysis.
- Contractor must perform all analysis by Forensic Scientist with at least 5 years' experience in forensic toxicology.
- The Laboratory must be directed by a person who is qualified by appropriate education and experience which is comparable to those of the American Board of Forensic Toxicology.
- Contractor must provide expert court testimony from a toxicologist with a minimum degree level of Ph.D. This expert must have testifying experience within the State of New York Court. Testimony can be via teleconference or video conference.
- On scene Toxicologist must have a Ph.D. in Forensic Toxicology and Certification by the American Board of Forensic Toxicology.
- Contractor must provide a Forensic scientist with an appropriate level of training and certification to perform on the scene investigations of a toxicological nature in those rare instances where it may be required.

ADDENDUM # 1

RFP-RC-2021-002
Forensic Toxicology Services

The information in this addendum supersedes any contradictory information set forth in the contract documents. Acknowledge receipt of this addendum in the space provided on the signature page of the bid proposal. Failure to do so, may subject the bidder to disqualification. This addendum forms a part of the contract documents.

Question # 1: When you state “Any and all price adjustments will be limited to the percent increase in applicable CPI Index for the preceding 12 months.” Would this only apply to the routine testing that is listed in RFP-RC-2021-002 Forensic Toxicology BT-13HR?

Response #1: Yes, this is only applicable to all tests included in the bid table RFP-RC-2021-002 Forensic Toxicology BT-13HR.

Question #2: Is it acceptable to provide FedEx prepaid labels to allow specimen to be picked up at times that are convenient for the County, instead of having an agreed upon time for pickups?

Response #2: Yes, prepaid FedEx or UPS labels are acceptable.

Question #3: Please provide a description of a scenario where a Forensic Toxicologist would be needed for an on-scene investigation and what the expectations would be for that Toxicologist once they are on scene?

Response #3: We would need a toxicologist on scene on an extremely limited basis at the time of a scene investigation; however, we may more likely need to call upon a Forensic Toxicologist urgently (via phone/text etc) at the time of scene investigation for consultation regarding how to collect and store specimens.

Question #4: Is it acceptable for any of our highly trained Forensic Toxicologist or Senior Forensic Scientist to issue our report findings?

Response #4: Yes

Question # 5: When specimens are received, they go to our specimen processing first to allow them to be entered into our internal change of custody, is that acceptable?

Response # 5: Yes, that is acceptable

Question # 6: Would a Forensic Lab with an additional accreditation to ISO/IEC 17025 from ANAB (ANSI/ASQ National Accreditation Board) be given preference?

Response #6: Yes

Question #7: Is attendance by the Forensic Scientist at the two Medical Examiners meetings per year required to be in person or can this be via teleconference?

Response #7: Teleconference or video conference is acceptable.

Question # 8: All test results are reviewed, and a final report is prepared by a forensic Toxicologist or a Senior Forensic Scientist with at least five (5) years' experience. Is this acceptable protocol to meet the requirement for sample analysis specified?

Response #8: Yes

Question #9: How often will it be required for the Contractor to provide a Forensic Toxicologist to perform on the scene investigations of Toxicological nature?

Response# 9: This will be needed rarely; on scene Toxicologist has not been required in the past 5 years.

Question # 11: RFP-RC-2021-002 Forensic Toxicology (BT-13HR)- May #0-17 and # 0-37 be combined given that they are both SIDS/SUIDS panels?

Response # 11: Lines can not be combined on the Bid table; each line will require a price input. Upon award the awarded vendor may request these tests be ordered as one test.

SIGNED:

Paul J. Brennan
