TITLE: DRUG AND ALCOHOL TESTING SERVICES AS PER THE OMNIBUS TRANSPORTATION EMPLOYEE TESTING ACT OF 1991, 49 CFR PART 40 AND AS UPDATED AS ADMINISTERED UNDER THE AUTHORITY OF THE U.S. DEPARTMENT OF TRANSPORTATION (USDOT) BY THE FEDERAL TRANSIT ADMINISTRATION (FTA) UNDER 49 CFR PART 40 AND PART 655 AS AMENDED, ETC

ADDENDUM #2

Question #10 - Page 19. "If the Offeror intends on using subcontractors a Subcontracting Plan must be included in this section." Unintended, this is under the Section 6 "Exceptions to Terms and Conditions". Please confirm this the correct placement for subcontractors?

Response #10 - It is not part of #6 – The subcontracting plan belongs in the Technical Response as part of "C".

Question #11 - Page 75. The mandatory "CERTIFICATION OF LOWER-TIER PARTICIPANTS". Is this intended for subcontractors? If so, do you expect the laboratory to submit as well as all collection sites?

Response #11 - If it is the same vendor for each laboratory only the one Head Quarters of the vendor will suffice.

Question #12 - Page 76. If this contract has no DBE goals, what is the purpose of returning this document? Do you expect the laboratory to submit? (Our lab is a worldwide organization with approximately 65,000 employees.)

Response #12 - FTA requires it to be signed to confirm you saw and answered it. FTA seeks DBE participation by "race neutral" means. Not, "race conscience"

Question #13 - The RFP says that you are doing your FTA randoms at 25% for drug and 10% for alcohol. However, the current FTA random rate is 50% for drug and 10% for alcohol. This rate was changed by the FTA in 2019. What random rate are you currently testing for each modality (FMCSA and FTA)?

Response #13 – The awarded firm must be responsible for advising the specific departments changes when they occur including the random rates are to meet their mandates and perform the required random pools percentages. We are currently testing FTA at 50%/10% and FMCSA at 50%/25% as required.

Question #14 - How many tests do you conduct on-site for each on-site testing event? An estimate or ballpark figure is OK.

Response #14 - Most On-Site is the Sheriff Division where they try to cover the end of one shift into the next shift so not to incur overtime and the Highway Department in the morning before they go out onto the road. Attached overall departmental usage report as referenced. The RCDPT - In the past RCDPT has tested 2-4 on-site, annually; but that isn't indicative of the future. The majority of the additional departments go off site unless there is reasonable suspicion or accident related.

Question #15 - How do you currently manage the FTA regulations that require you to vary your random testing times for all random tests since the FTA has a strict policy on making your testing unpredictable?

Response #15 - RCDPT tests on different days throughout the week, including Saturday, and different times annually. The additional departments vary based on the departmental work schedules and as scheduled by awarded firms administrator and departmental program administrator.

Question #16 - Are your FTA randoms done on-site or at a clinic?

Response #16 – RCDPT randoms are performed at an off-site clinic that is serviced by the vendor. We have had to have Saturday random coverage which was performed on site which sometimes was only for one employee depending on Saturday service coverage.

Question #17 - Are your FMCSA random tests done on-site or at a clinic?

Response #17 - The Sheriff Dept. and the Highway randoms are performed on-site. The other departmental users could be both on-site and at a clinic.

Question #18 - Out of your 300 employees, approximately how many FMCSA safety sensitive employees do you have?

Response #18 – The majority.
